To whom it may concern
MC Chair

Dear colleague,

We find it very interesting to participate in the new COST Action TD1303 EurNegVec: European network for neglected vectors and vector-borne infections, as NNC members.

The threat posed by the vectors and vector-borne infections to the community in term of disease transmission and impact on life quality in Montenegro contrasts with a substantial lack of knowledge. The main benefit to for the Biotechnical Faculty, University of Montenegro from this cooperation would be connection with eminent European researchers and introducing Montenegrin research staff to a research environment with the European dimension.

On the other side, the benefit to the COST Action would be to spread the network and research activity to new area/country loaded with specific ecology of vectors and vector-borne infections, such as West Nile outbreak from summer time of this year, and with important lack of information's about the main topics of the Action.

As responsible person for further activities, if this application will be accepted, we name researcher Igor Pajović PhD (e-mail: pajovicigor@yahoo.com).
